TECHNICAL SKILLS

Programming Languages: Python, SQL
Web Development: HTML, CSS, JavaScript, Bootstrap, React
Database Platforms: MySQL, PostgreSQL, PHP, Supabase, Firebase
Tools and Platforms: Vscode, Github
API Development & Integration: RestAPI, FastAPI (Building and consuming)

PROJECT EXPERIENCE

EUST School Enrollment System | *Website Development*   **July 2022**
Web Development
- Developed backend logic using PHP/MySQL for user auth, profile, and admin features
- Designed and maintained database structure with CRUD and image upload functions
- Integrated backend with frontend team, ensuring smooth full-stack functionality

T.I.P Lost & found system | *Mobile Development*   **Febuary 2023**
- Built the backend of a mobile Lost & Found system using Firebase Auth, Firestore, and Storage, managing real-time data for students and staff
- Integrated secure login, user roles, and data sync across student and OSA (admin) views in a React Native environment
- Designed and implemented CRUD operations and user maintenance features, ensuring smooth coordination of lost item reporting and approvals

EnrollBot | *NLP, Python (Tokenization, Stemming)*   **Nov 2024**
- Developed an AI-powered chatbot using natural language processing (NLP) techniques to help students navigate the school enrollment system.
- Used Python to tokenize and stem input text, optimizing it for better matching with pre-trained words/phrases and improving response accuracy.

EDUCATION

Technological Institute of the Philippines
Bachelor of Science in Information Technology
- Major in Cybersecurity

CERTIFICATES

Data Analytics
703 Parc House ll 21 Edsa, Guadalupe Nuevo, Makati City
April 17, 2024

Fundamentals of Python Programming
Data Analytics Philippines
March 22, 2025

Wickedly Secure: A Journey into cybersecurity & Data Sorcery
Junior Data Science and Artificial Intelligence Association of the Philippines (JDSAAP) & Junior Information Systems and Security Association(JISSA)
